

## Devtest Announces Its Membership in the Microsoft Gold Certified Partner Program

Melbourne, VIC, Australia, 30<sup>th</sup> November 2003 **Devtest** today announced it is a new member in the Microsoft Gold Certified Partner Program.

Devtest, which partners with clients to manage the quality of their software development and testing has been named as a Microsoft Gold Certified Partner Collaborative Solutions, due to its proven competence on the latest Microsoft technologies. Membership in the Microsoft Gold Certified Partner Program will provide Devtest with resources to help deliver robust Microsoft solutions and speed customers' time to market and reduce costs.

Devtest is extremely pleased with our new status as a Microsoft Gold Certified Partner," said Sarah Richey, Managing Director, Devtest. "We see our new status as being Microsoft's acknowledgement of our proven results and track record in delivering quality software collaborations".

The Microsoft Certified Gold Partner Program allows Devtest to utilise the Microsoft Certified Partner logo, which is an easy way for customers to recognise Devtest as certified by Microsoft Corp.

Richey said "Being a member of the program gives us early access to technical-readiness materials and Microsoft technologies to prepare us to help our clients deliver Microsoft .NET-based solutions.

"When customers are looking to implement a Microsoft technology solution for their business, their best bet is to turn to an expert—a Microsoft Certified Partner," said Rosa Garcia, general manager of the Partner Programs Group at Microsoft. "Microsoft provides its Certified Partners with in-depth access to existing and emerging Microsoft technologies and related training and resources to help ensure that they have the technical intimacy needed to deliver quality solutions. Today, Microsoft recognizes Devtest for demonstrating this level of expertise and welcomes it as a new Microsoft Gold Certified Partner."

### **About Devtest**

Devtest partners with their clients to evolve their traditional software development approach into a regiment that delivers high quality, cost-effective results. By implementing procedures and processes to manage the quality of complex software projects throughout the development cycle, Devtest is able to ensure the project is delivered on time, on budget and with quality. Projects range from multi-tier business critical applications, Windows DNA ® e-commerce solutions, .Net web portals and workflows, migrating from Mainframes to Microsoft Datacentres or smaller "quick to market" products.
